**Earn  
 COLLEGE CREDIT  
 in High School**

What does  
**TRANSCRIPTED CREDIT**  
 mean to me?

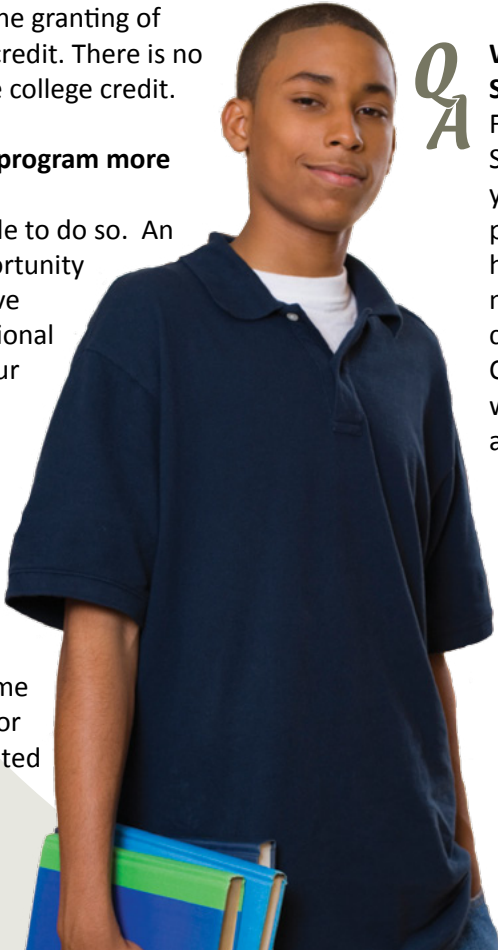

COMMON QUESTIONS AND ANSWERS ABOUT  
*Transcripted Credit*

**Q A** **What is transcripted credit?**  
Transcripted credit is a technical college course offered to high school students using technical college curriculum. It is a high school course that is the equivalent to a technical college course.

**Q A** **How does this benefit me?**  
Upon completion of the course, you will receive both high school and regular technical college credit. You will receive an official transcript from the technical college verifying the granting of technical college credit. There is no cost to you for the college credit.

**Q A** **Will I complete a program more quickly?**  
It might be possible to do so. An even greater opportunity is that you will have time to take additional courses during your technical college career that will enrich both your professional and personal life. If you choose not to take additional courses, you will have additional time in your schedule for study or work-related activities.

**Q A** **How will I know if I qualify?**  
Your guidance counselor and course instructor will inform you when you are enrolling in a high school course that qualifies for transcripted credit. When you satisfactorily complete a course that is offered for transcripted credit, you will receive not only high school credit, but also regular technical college credit. Upon completion of the course, you will receive an official transcript from the technical college.

**Q A** **Will I benefit if I don't attend Southwest Tech?**  
First of all, we're sorry to hear that Southwest Tech isn't currently a part of your educational plan. But don't forget, plans can change. Transcripted credit helps to keep all of your options open. You may choose to attend another technical college within the Wisconsin Technical College System. Other technical colleges will accept the transcripted credit if it applies to the program area.

**Q A** **What if I decide to earn a 4-year degree?**  
Technical colleges throughout the state are constantly developing transfer agreements with both private and public 4-year institutions. These agreements allow technical college students to receive credits toward the completion of baccalaureate degrees in participating institutions.

**Q A** **How do I learn about opportunities at my school?**  
The best place to start is with your high school guidance counselor. Your counselor has information about specific courses and about programs available through Southwest Wisconsin Technical College as well as other colleges within the system. Your counselor or faculty advisor can help you plan your education to take the best advantage of all opportunities.

**Q A** **Can I call Southwest Tech for more information?**  
Of course, we would be pleased to assist you. Call our toll-free number and ask to speak with one of the program counselors or advisors at Southwest Tech. They can help you arrange to speak to faculty members representing programs that interest you, and even make arrangements to allow you to sit in on classes in the various program areas. We hope you will call if we can assist you in any way.
